

K9Grass Mat Care Instructions

The K9Grass® Mat by ForeverLawn® provides you and your pet all of the benefits of our premium K9Grass® product in a convenient, portable mat. Your mat should be cared for as follows:

When mat is used for comfort (i.e. lying on, inside a crate, etc.):

1. Twice a Month: The grass should be vacuumed or brushed with a hair brush, when grass is dry to remove hair (Frequency may vary based on the type of dog.)
2. Clean the K9Grass mat as follows: Thoroughly clean by rinsing with water and spraying with an enzyme odor eliminator. Wet the surface, spray with Got Pee Odor Eliminator (concentrated product available through your ForeverLawn Dealer). Rinsing off the odor eliminator is not necessary. Allow it 4-8 hours to work. Machine washing and drying is not recommended. Hang by two corners to air dry (do not place in dryer).

When mat is used for elimination (i.e. in conjunction with a pup potty or elimination area):

1. Remove solid waste immediately or as quickly as possible.
2. Clean the K9Grass mat as follows:
 - A. Daily: Rinse with water and spot treat with enzyme odor eliminator.
 - B. Weekly (or as needed): Thoroughly rinse by liberally spraying with water. Treat the entire mat with enzymes (recommended that you use Got Pee Odor Eliminator available through your ForeverLawn Dealer). It is not required that you rinse but if you do, allow the odor eliminator eight hours to work before you do. Rinse. Machine washing and drying is not recommended. Hang by two corners to air dry (do not place in dryer).
 - C. Remove hair using a hair brush or a vacuum as needed.

A second K9Grass insert is recommended for use while one is being cleaned and dried. To order call 866.992.7876.
